Make your own Samuel Bear mask!

Take a paper plate, and cut it in half. On one half, cut circles out for eyes. From the other half, cut three circles, two slightly larger than the third. The two larger circles will become his ears, and the smaller one will be his nose.

Decorate the pieces with crayons, markers, paint, glitter, or whatever you want, then glue together as shown below. Once the glue has dried, punch holes in the sides of the mask and tie a string to each hole, so you can wear your mask!
