

Pirate's Eye Patch

When pirates go sailing, sometimes they wear eye patches. Here's how to make your very own eye patch. (Ask an adult to help you.)

You will need ---

1. A sheet of black construction paper or a square of felt
2. A round lid for a pattern.
3. A pair of scissors
4. A pair of black shoe strings
5. A pencil or white chalk

Let's Get Started---

1. Begin this project by making some space for this craft. The floor will do nicely.
2. Use the pencil or white chalk to trace the lid onto the black construction paper or felt.
3. Cut the circle out. Be sure to have an adult help you with the scissors.
4. Make a small hole in each side of the circle—just large enough to tie the end of one shoelace in each side of the circle.
5. Now, hold the eye patch over your eye and have an adult to tie the two ends of the shoelace together. There---you have a pirate's eye patch!
